

	<p>HyperX Beast</p> <ul style="list-style-type: none"> • BEST OF 2012 from KitGuru - Straight out of the box, the Kingston HyperX Predator Beast 8GB kits are very impressive and the 2400MHz modules weigh in around £40, which is impressive considering they can be clocked past 2,500MHz without adjusting the 1.65v.
	<p>HyperX Beast</p> <ul style="list-style-type: none"> • Worth Buying KitGuru - A great memory kit at a very competitive price point.
	<p>HyperX Beast</p> <ul style="list-style-type: none"> • Gold Award from Hardware Heaven - They ran flawlessly throughout our testing, even when pushed past the rated speeds, thanks to quality components and the heat sinks feel solid and are attached well.
	<p>HyperX Beast</p> <ul style="list-style-type: none"> • Gold Award from pcGameware - With a rated speed of 2400MHz this is already fast RAM, but add in the overclocking potential that we found and these modules have become fastest modules that we have yet tested!
	<p>HyperX Beast</p> <ul style="list-style-type: none"> • Best of 2012 - Memory Award from Vortez - This year's Kingston HyperX Beast's crossed the finishing line first to pick up our reader award for best Memory, beating out stiff competition from GSkill, Patriot and Kingston's own HyperX Predator DIMMs

	<p>HyperX Beast</p> <ul style="list-style-type: none"> • Editor's choice award from SkratchwizPC - The HyperX Beast range is perfect for gamers with its rugged armour style heat spreaders and very reasonably priced at only £50 for the 8Gb 2400Mhz kit.
	<p>HyperX 10th Anniversary Edition</p> <ul style="list-style-type: none"> • Gamers Choice awards eTeknix – It's been proven that Kingston have been one of the few select choices for top level gamers over the last 25 years and even more so with their HyperX top performing kits over the last ten, and the 10th Anniversary kit is a mark of their excellence and engineering expertise.
	<p>HyperX Predator</p> <ul style="list-style-type: none"> • Best of 2012 Performance award from OC3D - Kingston Predator at a blazing 2666MHz is the perfect combination of ridiculous speed in an attractive package, backed by one of the biggest names in the industry.
	<p>DataTraveler HyperX Predator</p> <ul style="list-style-type: none"> • Worth Buying from Kit Guru - "The Kingston DataTraveler HyperX Predator 512GB is breaking new ground for a high capacity performance oriented USB 3.0 flash drive. The sequential results are in the same zone as a last generation SATA 3Gbps Solid State Drive."
	<p>DataTraveler HyperX 3.0</p> <ul style="list-style-type: none"> • Without a doubt, the Kingston 64GB DataTraveler HyperX 3.0 is Gold Award standard hardware which lives up to the HyperX branding
	<p>HyperX 3K SSD</p> <ul style="list-style-type: none"> • Best of 2012 SSD Award from Vortex - In April the Kingston HyperX 3K was the first performance SSD in our labs to break the £1 per GB barrier, and was a watershed moment for gamers who may have previously felt priced out of taking advantage of the massive performance boost SSDs bring to the table.
